# COORDINATED ACCESS FOR HOUSING

If you are currently without stable housing and would like to meet with someone for direction regarding housing please contact one of our coordinated entry facilitators and our team would be happy to meet with you!

The Coordinated Access Process (CAP) is a method of matching individuals experiencing chronic and episodic homelessness to a housing program that meets their needs. Program referrals are made based on the length of time homeless, acuity (SPDAT score), best program fit, and available program spaces.
